## Sample Evaluation Comments

### **What were the aspects of this instructor's course that you considered most valuable to your learning?**

She teaches in a personal way and makes sure that every student understands the material and knows how to write their literature review/prospectus. She provides a friendly atmosphere that makes you enjoy class. She provides real life examples for course material that we can understand.

She makes the class very interactive, gives great examples, and explains things very well.

Prof was knowledgeable about subject, very thorough and helpful with feedback on assignments.

She broke everything down in a way that made it clear. I was worried going into this class, but she really helped.

Dr. P is very familiar with the process of creating and executing research projects. She was very flexible and cognizant of the needs of the class, and made adjustments to help us.

She worked really hard to make us all succeed. She took her time teaching us. She was passionate about her course. She also was really encouraging, taking time to work through our papers so we didn't feel overwhelmed.

Excellent instructor! She cares about her students but is NOT a pushover.

Very clear and thorough with information, enthusiastic and understanding, 10/10 would recommend.

She made the class interesting and fun. I think she is a great professor and person. She's so cool and is very easy to talk to. I can't wait to take more of her classes!

She just has a good way of teaching, class always goes by fast.

She never seemed like she was talking down on us. Very helpful and smart woman.

Well structured class, simple to understand, useful information & pertinent assignments.

I really enjoyed the way class was everyday. The professor was always knowledgeable and obviously wanted us to enjoy what we were learning.

Her attitude and knowledge of the subject. Her personality also helps because she was always willing to help you and was nice and friendly. I also liked how she showed videos to explain certain topics.

The real life application of what we learned. Having us make an actual strategy for a company helped to reinforce the material we covered.

I thought the organization as well as the amount of assignments were great. I never felt overwhelmed with workload.

All material was relevant- trends etc. Teacher was very up to date on all things such as use of hashtags, and Snapchat uses etc. Things that change quickly, were up to date. This kept class interesting, relevant and useful. Class format was easy to follow and challenging yet practical. Material is engaging and felt very useful.

I found the structure of the course very good and clear: every week was like a new chapter and you knew an assignment (quiz, response, discussion) would be expected and prepare you for the exam. The fact that the due times were always the same is also very helpful. Seeing each other in class every now and then was good, but also the weeks without meetings taught to divide and work on the material responsibly. I also think it's always great to have extra credit opportunities, which are not mandatory, but could just give you another chance. All in all, I would recommend this very pleasant and instructive course, as well as the professor.

I found the group assignment great, in general we were given the opportunity to be creative and self-reliant.

It was very organized. I could find information very easily on D2L for the class. I liked the PowerPoints and the quizzes were very comprehensive. It was a great introduction course and I have learned a lot about social media.

The professor was amazing! So sweet, nice and a great leader. You can tell she is super informative about her subject and tries to make the class enjoyable for everyone. I really loved the class and looked forward to going to class and learning the content. Overall fantastic course!
